TYPES OF PRODUCT PACKAGING:

- Casing** — polyamide casing avoids the oxidation process and ensures the safety of the product
- Substrate** — in this package, products are easy to carry and convenient to lay out on a showcase while maintaining an attractive appearance and excellent taste.
- MAP** — modified-atmosphere packaging (MAP) perfectly preserves the quality of the product and increases the shelf life. The gas used is safe for human health.
- Package** — a durable polyethylene bag perfectly protects the chicken carcass from various kinds of influences during transportation and storage of products.

- Stand-up pouch** — a bag with a cut handle and a zip fastener is convenient for transportation, is flexible, but at the same time can be in a stable vertical position and provide reusable hermetic closure of the contents.
- Vacuum** — vacuum packaging allows you to keep the freshness and juiciness of the product for a long time.
- Thermoformer** — molded packaging made of dense film, mainly for packaging products in marinade, allows you to see the composition of the product, pieces of meat, spices.
- Corrugation** — corrugated box, transport packaging made of cardboard.
